

Contract Specifications

Plan	CFD Charges/Fees	
A	\$1.5 per trade (Min \$2000 deposit)	\$0.01 per additional share (over 150 shares)
B*	\$6.95 per trade up to 3,000 Shares with a minimum deposit of \$25K	\$0.006 per additional share (Over 3,000 shares)
C*	\$9.95 per trade Up to 6,000 Shares with a minimum deposit of \$50K	\$0.006 per additional share (Over 6,000 shares)

Plan	Equities Charges/Fees	
A(1)	\$1.5 per trade (min \$10K deposit)	\$0.01 per additional share (over 150 shares) ECN and Sec fees Apply
A(2)	\$2 per trade (min \$5K deposit)	\$0.01 per additional share (over 200 shares) ECN and SEC Fees Apply
A(3)	\$2.5 per trade (min \$3K deposit)	\$0.01 per additional share (over 250 shares) ECN and SEC Fees Apply
B*	\$6.95 per trade up to 3,000 Shares with a minimum deposit of \$25K	\$0.006 per additional share (Over 3,000 shares) ECN and Sec fees Apply
C*	\$9.95 per trade Up to 6,000 Shares with a minimum deposit of \$50K	\$0.006 per additional share (Over 6,000 shares) ECN and Sec fees Apply

* Plan B and C (Equities/CFD) are limited to some platforms according to customer trading volume, remaining balance and a trading type/model. Fix plans might change instantaneously at the company's sole discretion upon notification to the customer of the relevant changes prior to the subsequent opening of a trading session.

ECN, TAF and SEC fees apply for Equities accounts and routing fees apply for CFDs on Equities accounts.

Options plan:

\$2-per-option

Additional commission on 1st contract – \$3

Note: Fees and prices may change at any time and according to the type of platform or product (CFDs or Equities).

Financing fee:

- Overnight daily margin interest of 0.026% applies to leveraged positions (Positions > Equity), for the difference between the value of the positions and the equity.

- An additional Overnight daily margin interest (Buying power overused) of 0.5% applies to leveraged positions that exceed twice the equity (Positions > Equity × 2), for the difference between the value of positions and equity × 2.

The charges apply to open positions kept overnight and are calculated daily, during the weekend per three days (Friday, Saturday & Sunday).

For example: End of day equity: 1500. End of day positions value: 3500.

Overnight daily margin interest of 0.026% = $(3500 - 1500) \times 0.026\% \times \text{number of nights}$ (1, on weekends = 3)

Overnight daily margin interest of 0.5% (BP over used) = $(3500 - 1500 \times 2) \times 0.5\% \times \text{number of nights}$ (1, on weekends = 3)

ECN, TAF and SEC fees:

The Company has no control over ECN, TAF and SEC fees rates and these may change at any time without prior notice to the Company. The Company will notify the Trader immediately after receiving notice of changes in ECN, TAF and SEC fees by Email or other electronic means. For all types of Financial Instruments that the Company offers, the commissions, financing fees, ECN, TAF and SEC fees are not incorporated into the Company's quoted price and are charged extra and deducted from the client's account.

FINRA Trading Activity Fee (TAF Fee) rate for sales of covered equity securities is \$0.000119 per share, with

corresponding per transaction cap for covered equity securities of \$5.95 for more than 50000 shares.

Nasdaq OMX Market Data Fee of \$15.1 (NYSE/AMEX \$2.4, NAS \$1.2, NAS Level II \$11.5) is charged on a monthly basis.

Deposits and withdrawals not made in US Dollars will be exchanged to/from US dollars according to bank check exchange rates. When the client withdraws funds, it is the Company's standard practice to send the money back to the client in the same currency the money was originally deposited.

SEC fees information can be reviewed at the following link <http://www.sec.gov/>

Nasdaq OMX fees can be reviewed at the following link <http://www.nasdaqtrader.com/Trader.aspx?id=DPUSData>

The following are the Equity ECNs' and Market Makers' routes and respective fees. The price of the fees is a mere indication and subject to changes by the route provider without prior notice to the Company.

Route	\$Remove	\$Add
ARCA*	0.0030	-0.0021
BATS	0.0029	-0.0025
EDGA	0.0030	-0.0003
EDGX	0.0030	-0.0023
NITE**	0.0000	0.0000
NSDQ	0.0030	-0.0020
SBSH	0.0000	0.0000
CFDR***	Fee charge range from 0.0015\$ - 0.05\$	
CLMX	Fee charge of 0.0015\$	

*ARCA charges \$0.03 per shares for Odd Lots (trades of less than 100 Shares)

**NITE charges 0.00001 cent per share for every trade of Pink Sheets & Bulletin Board stocks priced at 10 cents or less.

***CFDR fees apply only to clients trading CFDs on Colmex Pro Multitrader platform, for more details please refer to the CFD's on equities routing fees categorization table below.

On short positions, additional fees may apply. All details will be disclosed upon request by email or phone.

A pre-market and after-market trading fee apply as an integral part of the trading commission with an increase of \$0.03 per share.

Corporate Action Fee:

Mandatory corporate action - A mandatory corporate action is an event initiated by the board of directors of the corporation that affects all shareholders. Participation of shareholders are mandatory for these corporate actions. Examples of mandatory corporate actions include dividends, stock splits, mergers, pre-refunding, return of capital, bonus issue, asset ID change, and spin-offs.

Voluntary corporate action - A voluntary corporate action is an action where the shareholders elect to participate in the action. A response is required for the corporation to process the action. An example of a voluntary corporate action is a tender offer. The shareholder may or may not participate in the tender offer. Other types of voluntary actions include rights issue, making buyback offers to the shareholders while delisting the company from the stock exchange.

Mandatory with choice corporate action - This corporate action is a mandatory corporate action where shareholders are given a chance to choose among several options. An example is cash or stock dividend option with one of the options as default. Shareholders may or may not submit their elections. In case a shareholder does not submit the election, the default option will be applied.

Corporate Action Fee - For any Mandatory corporate action a processing fee of \$5 will be charged. For any Voluntary corporate action or Mandatory with choice corporate action a processing fee of \$50 will be charged.

For example:

Case 1: Client is holding shares (Short position) of a company that is paying dividends. The client is obliged to pay \$3.85 as a dividend for his/her holdings. In this case client's account will be debited with \$3.85 as dividend adjustment and charged \$5.00 for "Corporate Action Fee". Overall client's account will be charged \$8.85.

Case 2: Client is holding shares (Long position) of a company that is paying dividends. The client is entitled to receive \$3.85 as a dividend for his/her holdings. In this case client's account will be credited with \$3.85 as dividend payment and charged \$5.00 for "Corporate Action Fee". Overall client's account will be charged \$1.15.

The Dividend's charge will be done after the Execution Date.

The Dividend payment will be done in Equity accounts only, after the Payment Date and upon receiving the dividend by the company on behalf of the client.

Splits and reverse splits will be done following the corporate event's Effective date.

The [Declaration Date](#), also known as the [Announcement Date](#), is the date when an issuer's board of directors announces a dividend distribution.

Record Date - When an issuer decides to declare a dividend, its board of directors establishes a [Record Date](#). This is the date when a person must be on the company's record as a shareholder to receive the dividend payment.

Once the record date is set, the [ex-dividend date](#) is set according to the rules of the stock exchange on which the stock is traded. The ex-dividend date is typically set for two business days prior to the record date (If a company issues a dividend in stock instead of cash, the ex-dividend date rules are slightly different. With a stock dividend, the ex-dividend date is set on the first business day after the stock dividend is paid out.)

Usually, Investors need to buy the dividend-paying stock at least three days before the record date, since trades take three days to settle. Since the ex-dividend date is usually set two business days prior to the record date, investors need to own the stock one day before the ex-dividend date to receive the dividend.

The [Payment Date](#) is the date when dividend checks are mailed out or credited to investor accounts.

Therefore, The Company shall apply the fees on Long positions on the Payment Date, for traders who have held the position on the record date (subject to the ex-date terms which may vary), and the Company shall apply the fees on short positions, usually on the Ex-Date, unless otherwise is applicable according to the relevant market terms and Company's discretion. The actual fees may be set and recorded in the Client's account later than the Payment or Ex-Dates.

CFD's on Equities Routing Fees Categorization

*Number of shares range refers to the trades executed in the same CFD on equity symbol, price and time including simultaneous trades with different amount of shares of the identical symbol executed at the same price, might be consolidated for the purpose of routing fees categorization by the Company.

CFD's on Equities Routing Fees Categorization might change instantaneously at the company's sole discretion due to market liquidity, trading volume and trading type/model of the client account and upon notification to the client of the relevant changes prior to the subsequent opening of a trading session.

Spread trading, out of market filling and trading on low volume CFDs on equities, typically under 600,000 shares per day, is prohibited, and may lead to transactions being modified/cancelled with additional charges and/or fees being applicable including the termination of the agreement and legal actions initiated.

The prices and information contained herein are the ones most commonly used for our clients.

The Company reserves the right to change any of the above commonly used prices/fees from time to time.

Forex Currency Trading Conditions Overview for Colmex Pro MT4 Users

Colmex Pro high-speed execution and advanced trading environment puts all the right tools at your disposal enabling you to take advantage of opportunities to maximize your trading potential on the energy commodities, equity indices, precious metals and Forex currency trading markets.

	Forex
Leverage – Margin Requirements	From 1:1 to 1:30
Minimum Spread	0.3 pips*

Rapid execution and comprehensive trading tools	Colmex Pro offers secure systems to execute your trades.
Account currency	USD, EUR
Trade the lot size you want	Whether you're a beginner or seasoned trader you can choose the lot size to suit your strategy from a minimum of 0.01 lots.

*Apply for Currency pairs only. Information on Spot Metals and CFD Futures is given further in the document.

Forex Trading Online for Colmex Pro MT4 Users

Competitive Pricing and spreads

Colmex Pro is proud to offer competitive spreads on all currency pairs. On the major pairs such as EUR/USD, GBP/USD and USD/JPY, spreads start at 0.3pips.

Forex Trading Times

Forex trading online is available 24 hours a day, 5 days a week allowing traders access during all market trading times, starting at 22:00 Sunday and closing at 21:00 Friday (GMT).

* For USD/RUB pair, the trading hours are from Monday – Friday from 7:30 -22:00GMT

**For USD/ILS pair, the trading hours are from Monday – Friday from 7:00 -22:00CET

Order Sizes

Colmex Pro can execute any order size starting from 0.01 lot or the equivalent of 1000 of the base currency with no maximum order size.

Order Types

Traders can execute a number of orders with Colmex Pro, including:

Instant execution	Buy limit	Sell limit	Buy stop
Sell stop	Take profit	Stop loss	

Swap/Rollover

If a trade is kept open overnight, then there is a swap/rollover fee/income calculated on that position. The cost or income is calculated as the overnight interest rate differential between the two currencies on which the position is held, depending on the type of the position (long/short).

It is important to remember that one can gain or lose on swap and as such, one has either positive rollover or negative rollover. There is a possibility that some instruments may have negative rollover values on both sides therefore, the positive and negative values are decreased accordingly.

In the trading terminal 'swap' is automatically converted into the balance currency. Operation is conducted between 20:30 – 00:00 GMT. From Friday to Monday swap is charged once. From Wednesday to Thursday swap is charged at a triple rate.

*Islamic accounts shall not be subject to swap fees. It should be noted that the spreads applicable for such accounts shall be higher than the ones applicable to regular accounts. More specifically, the spread available for Islamic accounts is:

- For major currency pairs - in addition to the regular spread there will be an additional 2 pips over the FX commission plans indicated in the table below
- For exotic currency pairs - in addition to the regular spread there will be an additional 4 pips over the FX commission plans indicated in the table below.

Spot Metals Trading on Gold, Silver and CFD future on Crude oil for Colmex Pro MT4 users

Colmex Pro offers CFDs on spot gold and silver as an ideal solution for both long and short-term speculation or as an investment alternative.

Spot Metals Trading Times

Spot Metals trading online opens at 22:05 Sunday and closes at 21:00 Friday (GMT).

Pricing

Prices for both gold and silver are currently quoted in USD. With a required margin of 5%, trades can be leveraged up to 1:20 for gold, and with a required margin of 10%, trades can be leveraged up to 1:10 for silver and other commodities, allowing maximum trading flexibility.

Spreads

The typical spread on spot gold is at \$0.50 per ounce and \$0.05 per ounce on spot silver, which are some of the most competitive in the market. A trader can go both long and short on any of the two metals.

Order Sizes

The minimum trade size is 1 ounce of gold and 50 ounces of silver.

Order Types

Traders can execute a number of orders with Colmex Pro, including:

Instant execution	Buy limit	Sell limit	Buy stop
Sell stop	Take profit	Stop loss	

Swap/Rollover

Swap/Rollover is the interest paid or earned when a trade kept open overnight. This means that open position held at the end of the trading day will be rolled and remain open until the end of the next business day (unless the position is closed).

The Company reserves the right to change the swap value applicable to the Financial Instruments. The client can check in the Company's platform the swap rate of the financial instrument before placing any order.

In the trading terminal 'swap' is automatically converted into the balance currency. Operation is conducted between 20:30 – 00:00 GMT. From Friday to Monday swap is charged once. From Wednesday to Thursday swap is charged at triple rate.

Contract Specifications

Symbol	Description	1 lot size	Margin Requirement per min trade size	Fixed Leverage level	Spread***	Limit and Stop Level
XAU/USD	Gold Spot	1 oz	5%	1:20	0.5	0.1
XAG/USD	Silver Spot	1 oz	10%	1:10	0.05	0.1

- Minimum level for placing SL and TP as well as Stop and Limit Orders from a current market price.
- The above spreads are applicable under normal trading conditions. Colmex Pro has the right to amend the above spreads according to market conditions as per the 'Terms and Conditions'.

CFD Futures for Colmex Pro MT4 users

Key Benefits of Trading CFDs on Futures with Colmex Pro: Clients are able to place long or short orders. Get exposure to major equity indices with a fraction of the required exchange margin. Availability to trade on crude oil, natural gas and agricultural commodities futures – all within the same trading account.

Our clients can gain access to the major indices as well as major commodity and energy futures through CFDs offered by Colmex Pro.

Pricing

Colmex Pro provides prices on its CFDs that closely track the real prices of the futures contracts traded on the exchanges and prices are quoted in the underlying currency of the future contract. Colmex Pro requires a smaller deposited margin than that of the exchange. Note: your leverage in CFD Futures defined as a quarter of your FX leverage.

*Colmex Pro index trading hours are based on when their underlying reference markets are open. Colmex Pro indices will not be open for trading during holidays in which the reference markets are closed.

**Margin requirement/Leverage/Buying Power might differ in accordance with the residency of a client.

Order Sizes

Order sizes depend on the individual underlying futures contract, details of which are provided below.

Order Types

Traders can execute a number of orders with Colmex Pro, including:

Instant execution	Buy limit	Sell limit	Buy stop
Sell stop	Take profit	Stop loss	

Swap/Rollover

CFD futures for Colmex Pro MT4 users: there is no overnight swap charges but some CFD future contracts in the table above, has expiry date. Expiration of CFDs occurs on specific date and specific time. The expiration date can be seen on MT4 trading platform before initiating a trade, the expiration time is usually the end of trading session on the expiry date.

The Client is expected to close all open CFD future contracts prior to the contract expiration, otherwise the Company reserves the right to rollover automatically the transaction for a new CFD future contract, with new expiration date on the next opening trading session date. In this case, the old CFD future contract will be deemed as closed at the price of the end of the expiry date and new CFD Future Contract considered opened at the price of the next opening trading session date. The client is not the position to have profit or loss due to a price difference between the old and the new contracts, therefore the company will debit or credit the clients account with the difference inquired in price between CFD Futures Contract after the rollover initiated.

CFD Futures Contract Details

Please note that there is a floating spread for trading in CFDs on futures which is not listed.
Minimum level for placing SL and TP as well as Stop and Limit Orders from a current market price.
